Midterm Submission

Polymarket Calibration Pipeline

Team number	04
Team members	Yazdan Musa Dániel Polgár
Milestone	Midterm (Week 7)
Repository URL	`https://github.com/danypolgar/deng`
Release tag	`midterm` `https://github.com/danypolgar/deng/tree/midterm`
Commit hash	`0858e29281a791ec382a7509a46ad4bf461dc272`
Commit date	24 October 2026, 20:53 (Europe/Zurich)
Visibility	Public. No access grant is necessary.

Assessed content

The assessed repository state is the tag `midterm`, which points to the commit hash above. The `README.md` at this commit contains:

- Use case, data source and data-quality risks (sections 1 to 3)
- Architecture v0.1 and Architecture v0.2 with the changes and their reasons (sections 4 and 5)
- Ingestion design, transformations and their justification, data model (sections 5 and 6)
- Setup, execution, rerun, backfill and verification instructions for reviewers (section 9)
- Known limitations (section 11)

Notes for reviewers

- Only Docker is necessary. No API keys and no cloud credentials are necessary.
- No VPN is necessary in Switzerland. The pipeline resolves the Polymarket API hosts through DNS-over-HTTPS.
- The first run (30-day backfill) takes approximately 6 to 8 minutes.
